Diana:

Regarding one of the topics we discussed Monday, the City of Dubuque is finalizing a new proposed ordinance that would place significant restrictions on anyone wanting to drill a well (of any type) within its corporate limits. This initiative has been underway for a while, after IDNR had asked us to adopt an ordinance banning well-drilling within 1,000' of Dubuque's many LUST sites. Now is obviously the time to add language regarding the former Peoples Natural Gas site at 925 Kerper Boulevard and other National Priorities List sites in Dubuque.

Your input regarding the restriction radius(i) for the National Priorities List sites is appreciated.
